Career objective

I am a CSE student and Mern-Stack developer dedicated to user-friendly modern UI and scalable web architecture. My ambition is to contribute to a forward-thinking company where I can refine my technical craft and eventually grow into a full-stack leadership role.

Skills:

Languages: HTML, CSS , C++, Java, JavaScript.

Frameworks: Tailwind CSS, Bootstrap, React, Next.js, Node.js, Express.js.

Database: MongoDB , MySQL.

Hosting: Firebase, Vercel, Netlify.

Tools: VS Code, X Code, Cursor, Github.

Projects:

Asset-Verse | Full-Stack Asset Management System | (March 2026)

Overview: A robust B2B SaaS platform designed to streamline corporate asset tracking and inventory management. It bridges the gap between HR Managers and Employees by providing a secure, centralized dashboard for asset requests, allocation, and real-time monitoring.

Key Feature:

- RBAC-based HR & Employee portals for asset management
- Real-time inventory tracking with automated PDF invoicing
- Stripe-powered subscription system with scalable employee limits

Technology: React, Tailwind Css, Node.js, Express.js, MongoDB, Firebase Auth, JWT.

AI Model Inventory | Full-Stack Web Application | (December 2025)

Overview: A comprehensive AI model management platform designed to help developers showcase, organize, and manage their AI models. The platform features a centralized dashboard where users can add, track, and categorize different AI models (LLM, Image Gen, Audio, etc.) with real-time database integration.

Key Feature:

- A responsive, data-driven table to view, filter, and manage AI models with individual detailed views.
- Secure user management using Firebase Authentication, allowing developers to manage only their own added models.
- Full Create, Read, Update, and Delete (CRUD) functionality for model management with real-time feedback using custom Toast notifications.

Technology: React, React Router, Tailwind Css, Node.js, Express.js, MongoDB, Firebase Auth.
